

Just the Facts...

U.S. Army Center for Health Promotion and Preventive Medicine

The U.S. Army Center for Health Promotion and Preventive Medicine provides worldwide scientific expertise and services in these disciplines:

- Clinical and field preventive medicine
- Environmental and occupational health
- Industrial hygiene
- Health risk assessment and risk communication
- Health promotion
- Epidemiology and disease surveillance
- Toxicology
- Related laboratory sciences

CHPPM's people

1,059 military, civilian and contract personnel—chemists, physicists, engineers, physicians, epidemiologists, optometrists, audiologists, nurses, industrial hygienists, toxicologists, entomologists and other scientists

CHPPM's presence

- *Headquartered at Aberdeen Proving Ground, Md.*, with five subordinate commands located at Fort George G. Meade, Md.; Fort McPherson, Ga.; Fort Lewis, Wash.; Landstuhl, Germany; and Camp Zama, Japan
- *Deployed around the world*, providing occupational and environmental health surveillance; rapid-response teams for specific incidents; surveillance equipment and media for preventive medicine detachments assigned to fighting units
- *On U.S. military installations*, providing environmental and engineering services; making health hazard assessments of new weapons and equipment; implementing health promotion and injury and disease prevention programs through surveillance, analysis, training and education; delivering health risk communication support to commanders and their surrounding communities
- *On the Web* at <http://chppm-www.apgea.army.mil/>
